The Department of State External Research Program

The External Research Program of the Department of State brings to bear on foreign policy the special knowledge and insights to be found outside the Government in universities, nonprofit research organizations, and among private foreign affairs experts. Outside studies supplement the Department's own in-house research capabilities and provide independent, expert views to policy officers and analysts. The Department looks to external research to help:

- Detect or clarify situations and trends in foreign affairs.
- Anticipate international problems and opportunities.
- Review, evaluate, and plan foreign policies and programs—political, economic, social, technological, cultural, etc.

... on, and conduct of U.S. foreign

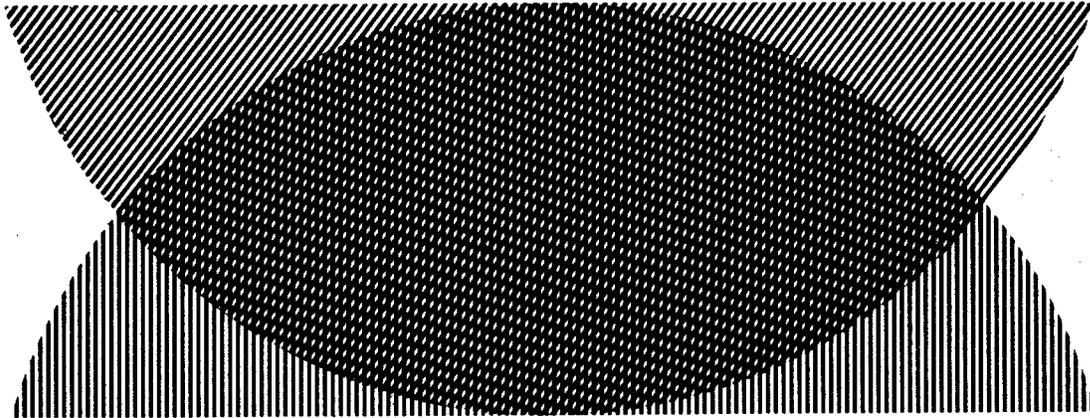

- Improve and advance theory, methods, and data in disciplines and fields which bear on foreign affairs.

The Department draws on external research in a number of ways and through a variety of channels. There is a steady exchange of information and ideas between Department officials and outside specialists engaged in research on foreign affairs. Although much of this free flow takes place informally, there are several formal routes for the introduction of external research into policy:

- Study contracts with universities, research organizations, or individual specialists. A Department-wide Research Council plans and coordinates major contract studies.
- Use of private experts as consultants.
- Organization of Department research conferences, symposia, roundtables, and seminars.
- The Foreign Affairs Research Documentation Center which collects and lends a variety of research papers to Government officers.

The Department's External Research Program also benefits from and contributes to the foreign affairs research programs supported by other Government departments and agencies. This is accomplished through an interagency committee on foreign affairs research chaired by the Department of State and reporting through the Under Secretaries Committee to the National Security Council and the President.

For more information about the Department of State External Research Program, address inquiries to E. Raymond Platig, Director, Office of External Research, Department of State, Washington, D.C. 20520.

PREFACE

The *Inventory of Government-Supported Research Projects on Foreign Affairs* is prepared annually for the Under Secretaries Subcommittee on Foreign Affairs Research (USC/FAR). The subcommittee was established in 1971 pursuant to a Presidential directive that the USC assume responsibility for assuring interagency coordination of external research on foreign affairs supported by various departments and agencies of the executive branch. The Department of State's Office of External Research (XR) provides the secretariat for the subcommittee. The chart on page v depicts the various elements in the current USC/FAR system.

External research activities of concern to the USC/FAR are those involving application or advancement of the social sciences and humanities as these bear substantively on foreign areas and international relations.

The unclassified inventory consists of five volumes: I. American Republics; II. East Asia; III. Europe; IV. Near East, South Asia, and Africa; and V. International Relations.

Volumes I-IV are organized by country within each region. Projects involving the entire region or more than three countries within a region appear under the "General" heading at the beginning of the listings.

Volume V is organized under five categories of international relations: Political-social, military, economic, science and technology, and general. Projects having both national and international dimensions are cited in the appropriate regional volume and in Volume V.

Percentage estimates are provided for each project to give an indication of geographic focus, functional categories best describing the substance of the research, and purpose(s) of the research. All percentages are rough indicators of content and purpose, not precise evaluations.

Information about studies resulting from the projects is given at the end of each project citation. Studies identified by a FAR number may be borrowed from the Foreign Affairs Research Documentation Center in accordance with the procedures outlined on page iv. XR maintains the Documentation Center to collect and disseminate both reports produced under Government-supported research contracts and relevant unpublished research papers produced by individual scholars and university and other private research centers.

Other publications related to the External Research Program of the Department of State are cited on the inside back cover.

HOW TO BORROW COMPLETED STUDIES

Completed studies on file in the Foreign Affairs Research (FAR) Documentation Center and available for loan from INR/XR are noted under "Resulting Studies" in the last line of each project entry, e.g. FAR 12345, AVAILABLE FROM INR/XR.

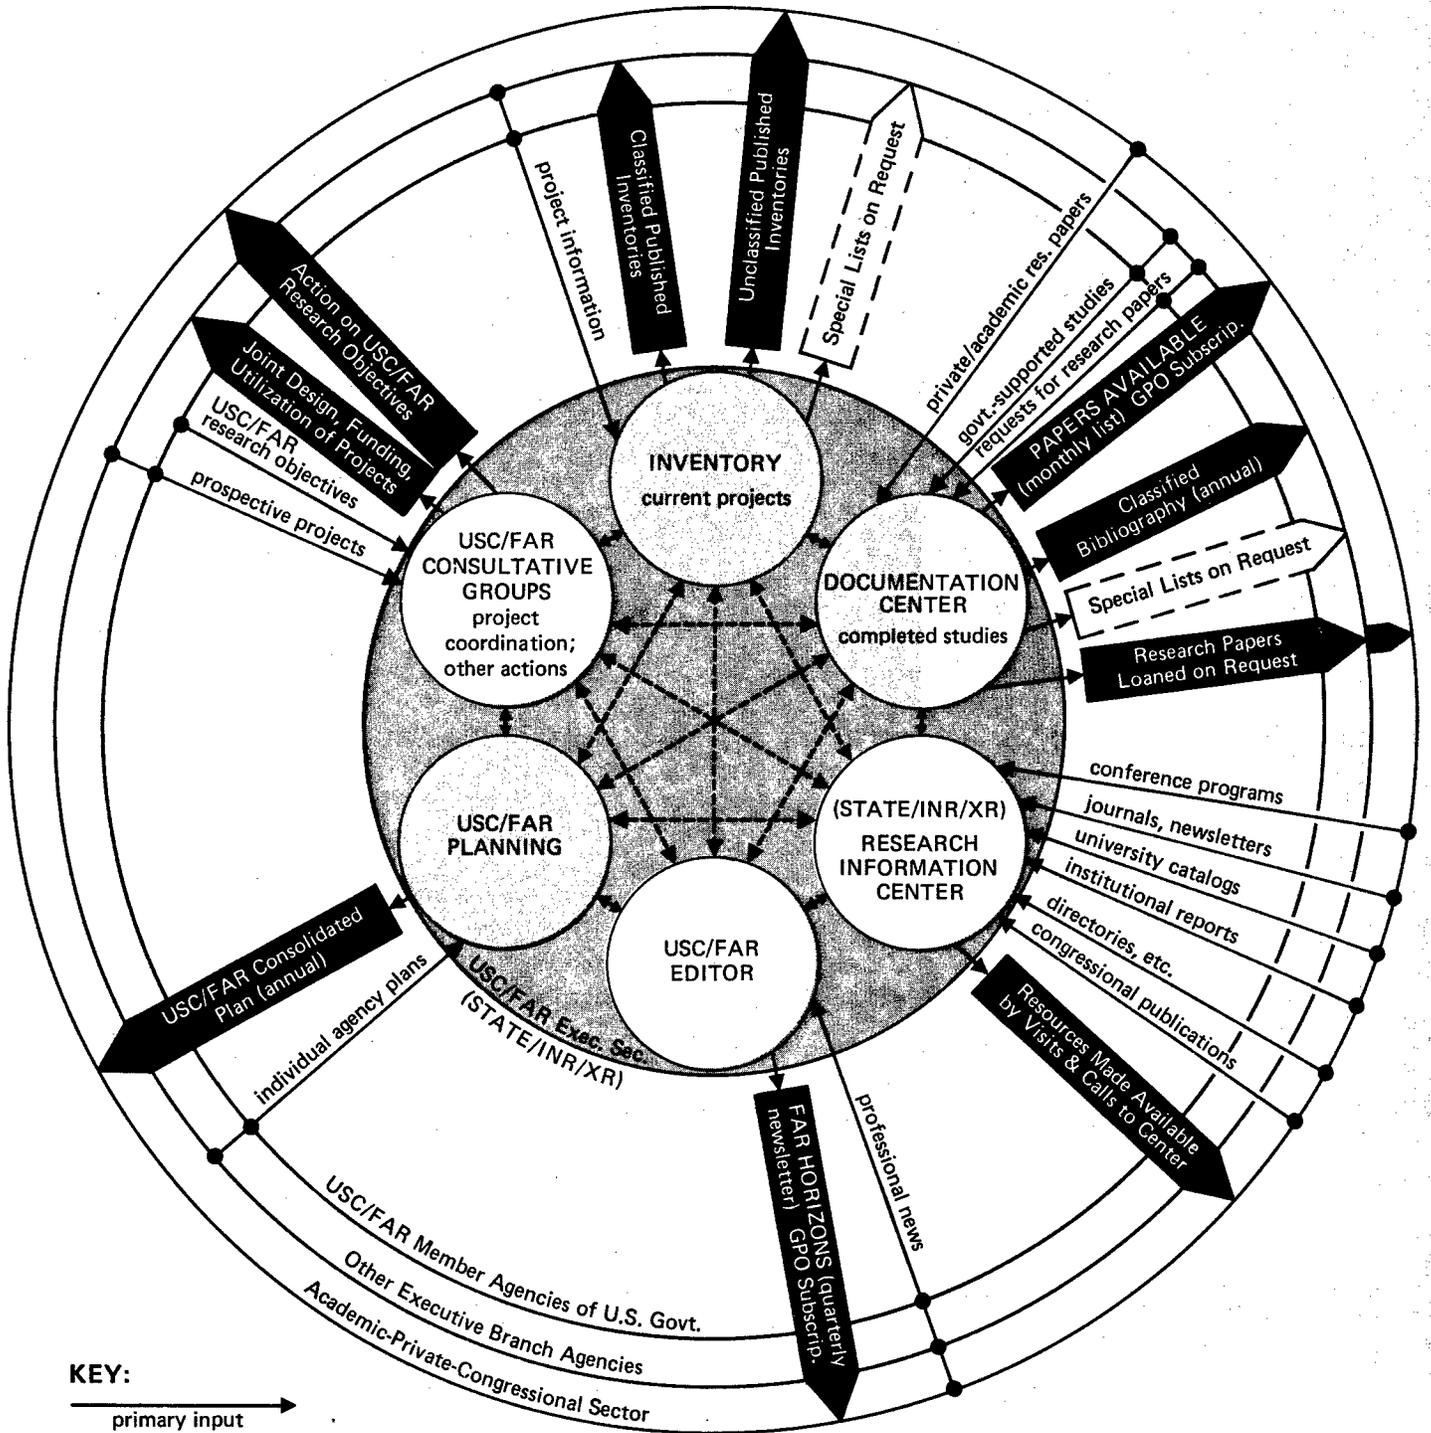

Government Employees and Government Contractors. May borrow completed studies by filling in a Document Request Card (attached in the back of this volume) for each FAR-numbered study requested.

Private Users. May borrow any FAR-numbered study prepared under contract to the Department of State by writing or calling the FAR Documentation Center. Both the FAR number and the title should be used when requesting papers. Requests for studies prepared for other Government agencies should be made directly to the agency cited in the project entry.

AIM IS TO RESOLVE ANTHROPOLOGICAL CONTROVERSY OVER THE NATURE OF THESE SYSTEMS OF CLASSIFICATION AND SHOW THEY CAN BE ASSIMILATED TO A RECENTLY DEVELOPED MODEL OF SYSTEMS OF KIN CLASSIFICATION IN GENERAL. STUDIES SUGGEST MAJORITY OF THESE SYSTEMS FALL IN THE RANGE OF A SINGLE STRUCTURAL TYPE, SUCH THAT ANY PARTICULAR SYSTEM IS READILY UNDERSTANDABLE AS LITTLE MORE THAN A SIMPLE PERMUTATION OF ANY OTHER SYSTEM. IF SO, IT SHOWS THAT RADCLIFFE-BROWN WAS ESSENTIALLY CORRECT IN ASSESSING THE NATURE OF AUSTRALIAN SYSTEMS OF KINSHIP AND MARRIAGE, THOUGH HIS THEORIES HAVE BEEN CHALLENGED BY SOME ANTHROPOLOGISTS IN RECENT YEARS. IN THE 1960'S THE SEA BETWEEN THE ISLAND AND THE MAINLAND WAS FILLED AND TAKASHIMA BECAME PART OF THE SWIFTLY GROWING INDUSTRIAL CITY OF KURASHIKI. FISHING WAS NO LONGER POSSIBLE AND RESIDENTS TOOK EMPLOYMENT IN MANUFACTURING PLANTS, WITH PROFOUND EFFECTS ON THEIR LIVES. FAMILIAL LIFE AND COMMUNITY SOCIAL ORGANIZATION HAVE CHANGED AND OLD CUSTOMS HAVE DISAPPEARED, WHILE PHYSICAL AND PSYCHOLOGICAL DISTRESS ARE REPORTED. SCOPE: ANALYZES THE MICRO-ECONOMIC ASPECTS OF LDC EXPORT INCENTIVE POLICIES (THE SUCCESS OF SUCH EXPORT PROMOTION POLICIES IS OFTEN RELATED TO HOW FIRMS AND INDUSTRIES WITHIN THE COUNTRY PERCEIVE THESE POLICIES). THE REACTIONS OF SPECIFIC FIRMS AND INDUSTRIES IN ONE SAMPLE LDC TO VARIOUS EXPORT INCENTIVE MEASURES WILL BE ANALYZED AND COMPARED TO THE RESULTS PREDICTED BY ECONOMIC THEORY. THE STUDY WILL RELY PRIMARILY ON INTERVIEWS WITH FIRMS AND INDUSTRIES, FOLLOWING A PRESCRIBED QUESTIONNAIRE METHODOLOGY, CARRIED OUT BY LOCAL PARTICIPANTS. RESULTS OF THE QUESTIONNAIRE WILL BE TABULATED AND STATISTICALLY ANALYZED USING REGRESSION AND FACTOR ANALYSIS. THESE RESULTS WILL THEN BE COMPARED TO THOSE PREDICTED BY TRADITIONAL THEORY WITH SPECIAL ATTENTION TO POLICY IMPLICATIONS OF DIVERGENT RESULTS.
